

Enterprise GenAI Portal

Boost your team's productivity with GenAI-based automatic language skills, while keeping your security team happy. Choose the right GenAI model for every task and amplify it with Machine Translation for non-English content. Pay for actual usage, not seats.

Reuse and share your best prompts

Our automated language skills distinguish instructions from content to enable easy reuse and secure sharing of your top prompts with your colleagues. Empower your entire team to summarize content, follow brand voice and inclusivity guidelines, and craft the best emails without needing to be prompt engineers.

Access multiple secure LLM platforms

Looking for the power of OpenAI's GPT-4, the speed of GPT-3.5, Anthropic Claude's ability to process large documents, Google PaLM's safe content production, or Azure because it's your IT department's favorite? We've got you covered! Optimize performance, quality, and cost by choosing from one of our four LLM platforms, or plug in your own.

 **Highly secure**
ISO-27001 certified. All data encrypted in transit and at rest. Available MT and GenAI models whitelisted based on customer data processing and protection requirements.
